DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-5, drawn to a pressure sensor, classified in class 250, subclass 459.
 - II. Claims 6 and 7, drawn to a method for sensing pressure, classified in class 356, subclass 480.
 - III. Claim 8, drawn to a method of making a pressure sensor, classified in class 73, subclass 704.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the method for sensing pressure can be practiced by a materially different apparatus where the apparatus uses bulk optics rather than an optical fiber to emit the light beam.
3. Inventions I and III are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product can be made by a method where the substrate is formed with an opening rather than forming an opening after the substrate is formed.

Art Unit: 2877

4. Inventions II and III are related as process of making and process of using. The inventions are distinct if either or both of the following can be shown: (1) that the process of making as claimed can be used to a materially different process of using or (2) that the process of using as claimed can be used by another materially different process of making (MPEP § 806.05(f)). In the instant case the process of using can be performed by a materially different process of making. For instance, where the substrate is formed with an opening rather than forming an opening after the substrate is formed, the process of using does not require the specifics of the process of making.

5.

6. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

7. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group III, restriction for examination purposes as indicated is proper.

8. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group III, restriction for examination purposes as indicated is proper.

9. A telephone call was made to Melvin Robinson on 4/30/04 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 2877

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

10. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Papers related to this application may be submitted to Technology Center (TC) 2800 by facsimile transmission. Papers should be faxed to TC 2800 via the PTO Fax Center located in CP4-4C23. The CP4 Fax Center number is 703-872-9306 for regular communications and for After Final communications.

If the Applicant wishes to send a Fax dealing with either a Proposed Amendment or for discussion for a phone interview then the fax should:

- a) Contain either the statement "DRAFT" or "PROPOSED AMENDMENT" on the Fax Cover Sheet; and
- b) Should be unsigned by the attorney or agent.

This will ensure that it will not be entered into the case and will be forwarded to the examiner as quickly as possible.
